

2020 Annual Illinois HIV Integrated Planning Council (IHIPC) Calendar of Activities_ 4/16/2020

☐ Face-to-face meetings
 ☐ Webinars
 ☐ Trainings: Required for All and/or New Members
 ☐ Email Presentations/Discussions

January-February	Mon, March 16 th	Tues, March 17 th	Wed., March 18 th	Thurs, April 30 th	Thurs, June 25 th	Thurs, Aug 20 th	Sept. (All members complete by Oct. webinar)	Mon., Oct 26 th	Tues., Oct 27 th	Thurs, Dec. 10 th	Thurs, Dec. 17 th
Trainings to be completed by IHIPC members in Jan-Feb 2020	11:30 – 4:30 pm In-person Mtg Location	8:30 am-4:30 pm In-person Mtg Location	8:30 – 11 am In-person Mtg Location	IHIPC webinar 9:30 am- 12:30 pm	Email Presentations/ Discussion	IHIPC webinar 9:30 am- 12:30 pm	Online Training: Overview: Care Interventions, Strategies, and Best Practices – 30 min	11:30 am -4:30 pm IHIPC Mtg. Springfield (MCLI)	8:30 am -1:30 pm IHIPC Mtg. Springfield (MCLI)	IHIPC webinar 9:30 am – 12:30 pm	Training: IHIPC New Member Orient. webinar 9a-12p and 1-4p
Webinar: Basic HIV Epidemiology/ Using Data for HIV Prevention Planning – 60 min (part of New Member Orientation)	Working lunch Welcome and Introductions – 45 mins	Results of Current Member Demographic Survey & 2019 Satisfaction Survey -40 min/ 10 min discussion Update: GTZ-IL Implementation-20 mins Public Comment Period – 10 mins	Welcome; Overview of Day – 15 mins	Increase Access to Health Care and Improve Health Equity: Linkage: 2020 Care Grant, Budgets and Integrated Plan-- 30 mins/15 mins for discussion	Measuring Our Progress Through Data: FFY 19 HIV Care/Prevention Service Delivery & Mapping – 50 mins /10 min discussion	Increase Access to Health Care and Improve Health Equity: Linkage: 2021 Prevention Grant and Integrated Plan/ HIV Prevention Regional Gap Analysis – 45 mins with discussion	Online Training: Overview: HIP & HIV Prevention Interventions Services -60 min	Regional Care/Prevention Lead Agent Updates – 45mins Increase Access to Health Care and Improve Health Equity: Discuss Proposed 2021 I&S Guidance - 30 mins/15 min for discussion/vote	Measuring Our Progress Through Data: Updated State/Regional HIV Care Continua – 45 mins	Measuring Our Progress Through Data: Overview of Illinois' 2020 Integrated Plan Progress Report and Updated 2020 Plan -40 min with 20 min discussion	
Webinar: Conflict of Interest; IHIPC Meeting Process, Robert's Rules of Order-60 min (part of New Member Orientation)	IHIPC Liaisons – Overview of Programs and Relevance to HIV Planning -30 mins Measuring Our Progress Through Data: Illinois HIV Epi Trends-30 min/ 30 min discussion	HIV Section Updates - 10 mins Regional Care/Prevention Lead Agent Updates -60 minutes Improve Health Equity: Addressing Stigma in HIV -- 30 min/ 30 min discussion	Build the Future Workforce: Leadership Development Training – 45 mins Leadership Development Training – 45 mins	Improve Health Equity: Recommended 2021-2023 Priority Pops for Targeted Prevention Services --30 mins/15 mins for discussion/vote Public Comment Period -15 mins	Overview: Current Membership Demographics/Gap Analysis for 2021 Membership Cycle will begin July 1) – 30 mins CSA: IL HIV care/ prevention 2020 resource inventory	Results: Risk-Targeted Focus Groups – 45 mins with discussion Improve Health Equity: HIV Testing Data Analyses/Other Research/ Recommended 2021-2023 Risk Group Definition Changes- 45 mins/ 15 mins for discussion/vote		IDPH and Liaison Updates - 30 mins Improve Health Equity: GTZ-IL Through Provision of Minority Health Services -30 mins/15 mins for discussion/vote 2020 RWPB Client Survey Results – 45 mins	Measuring Our Progress Through Data: Overview of NHAS 2020 Indicators and Update on our 2020 Progress- 45 mins	Overview of 2021 IHIPC Committee Objectives – 30 mins	
Gender Language Training-60 min (part of New Member Orientation)	Break 15 mins Care for Linked Conditions: Addressing Illinois' STD Epidemic to GTZ-IL 30 min/ 30 min discussion	Working lunch – 45 mins Improve Health Equity: Addressing Racism in HIV Workforce -- 30 min/ 30 min discussion Committee breakout meetings – 60 mins	Leadership Development Training – 45 mins	CSA: IL Prevention CBA Plan 20 mins				Break – 15 mins Increase Efficiency Through Governmental Coordination: Liaison Update – St. Louis Planning Council -30 mins/15 mins for discussion/vote	Integrated Plan Concurrence Overview, Discussion, and Vote – 30 mins Public Comment Period – 15 mins	Overview of Plans in 2021 for 2022-2026 Integrated Plan development -30 mins Public Comment Period – 15 mins	
Online: IL Open Meetings Act Training – 60 mins (part of New Member Orientation)	Increase Access to Health Care and Improve Health Equity: Regional Comm. Engagement Mtg NA Results -45 min/ 15 min discussion	Care for Linked Conditions: Liaison Update: IPHCA - Leveraging Opportunities to GTZ-IL - 30 min/ 30 min discussion Improve Health Equity: Addressing Racism and Discrimination in HIV -- 30 min/ 30 min discussion			Public Comment Period -15 mins			Care for Linked Conditions: Addressing HIV & Aging to GTZ-IL 30 min/ 30 min discussion Committee Breakout Meetings (Finalize 2021 Objectives) -45 mins	Present/Vote on Proposed Changes to the IHIPC Bylaws – 20 mins Results & Vote: 2021 New Member Selection – 30 min

The primary task of the IHIPC is to partner with IDPH to address how the jurisdiction can collaborate to accomplish the National HIV/AIDS Strategy and the Getting to Zero Illinois goals and objectives. The primary goal of the IHIPC is to inform the development and update of the Illinois Integrated Plan for HIV Prevention and Care.

Standing Committees	Prevention Strategies & Interventions	Epi Profile and Health Disparities Data	Community Services Assessment (CSA) Activities	Gap Analyses	Priority Populations
<p>Monthly conference calls; break-out meetings during face-to-face IHIPC meetings; work to complete committee objectives; present findings to IHIPC.</p> <ol style="list-style-type: none"> 1. Epidemiology/Needs Assessment 2. Primary Prevention 3. Linkage, Retention, Reengagement, Antiretroviral Therapy, and Viral Suppression 4. Membership 	<p>IHIPC presentations and discussions about prevention strategies and interventions and associated recommendations to address the NHAS goals for consideration for inclusion in the Integrated Plan.</p>	<p>Description of the HIV/AIDS and HIV/STD co-infection epidemic in Illinois. Epi Profile data is updated annually by the HIV and STD Sections and supplemented with data such as Unmet Need, MMP, Continuum of Care, social determinants, and applicable research.</p>	<p>Process to determine jurisdictional needs, gaps, barriers, and challenges associated with HIV prevention and care services for PLWH and populations at highest risk of HIV infection. Includes review of the current resource inventory, analyses of needs assessment activities collected/conducted during the year, review of other applicable needs assessment data from other agency/program areas, and identification of strategies to address needs, gaps, barriers, and challenges.</p>	<p>Process led by IDPH, with input from the IHIPC Committees, to 1). Determine gaps between the HIV/AIDS epidemic and HIV prevention and care service delivery in the jurisdiction, and 2). Determine gaps in IHIPC membership. IDPH presents the results of the gaps analysis to the full IHIPC and solicits recommendations and input.</p>	<p>The multi-step process to identify and define the populations prioritized for targeted prevention strategies and interventions efforts in the upcoming year.</p>

Six Domains of the GTZ-IL Plan:

I. Build the Future Workforce

The HIV health care and public health workforce is the backbone of our HIV service delivery system, providing needed services to individuals living with or vulnerable to HIV. As scientific and practical knowledge changes, our workforce must learn new approaches and adapt to the evolving needs of people living with or vulnerable to HIV.

II. Increase access to health care

People must know that HIV services are available to them and can bring value to their lives. Regardless of HIV status or where a person receives services, people screened for HIV must be linked to high-quality health care services that support use of ARV medications for HIV treatment or PrEP, as well as other services necessary to achieve health and wellness. After connecting to health care, people must receive needed support to stay connected and to use ARV medications consistently and correctly.

III. Improve Health Equity

The data are clear: grave disparities exist in the HIV epidemic. These disparities map to race, ethnicity, sexual orientation, gender identity, age and a person's other lived experiences. We must use data to define which communities face the greatest disparities and in what context. With this information, we can set tangible and aggressive targets. The first set of goals and strategies in this section define the population-based metrics that will guide investments in our effort to build health equity. report back actual advancement toward goals. All goals and strategies have a target completion date of 2023, unless otherwise noted.

IV. Increase Efficiency Through Governmental Coordination

State and local public health departments play a key role in organizing, funding, monitoring and improving quality programs and services for individuals living with or vulnerable to HIV. When these institutions intentionally and effectively coordinate with each other, the overall HIV service system is more efficient, expansive and effective.

V. Care for Linked, Co-occurring Conditions

People living with or vulnerable to HIV often need services beyond those that address HIV alone. Many need comprehensive behavioral health care (including mental health and substance use treatment), screening and treatment for sexually transmitted infections (STIs), and vaccination against sexually transmittable or communicable diseases such as viral hepatitis and meningitis. Appropriate, timely and seamless care for these and other conditions helps individuals maximize HIV services and achieve positive health outcomes.

VI. Measuring Our Progress Through Surveillance and Other Data

Our success relies on our ability to define, measure and evaluate key goals and strategies. Where available, outcomes data will be essential to measuring progress. When competing data systems exist, they should communicate and offer seamless integration to avoid duplication of efforts. Collecting meaningful and timely data at state, city and community levels will be essential to tracking GTZ-IL's progress and ensuring the 20+20 Target is achieved.
